

Kertak Nanotechnology, global leader in the production of inorganic nanofibers is currently seeking new colleagues for its Production team which is located in Nové Město na Moravě, Czech Republic. We are looking for self motivated, independent and hard working individuals who are willing to help us to start the unique project from the global point of view.

## **Production line operator/manager**

What we require?

- University degree (Chemical Technology – Sol Gel or Nanotechnology field is advantage),
- Manual and technical skills;
- Independent, flexible and hard working;
- PC skills (MS Office, Power Point);
- Good knowledge of English language (written and spoken on communicative level);
- Experiences with work at chemical laboratory, preparation off polymer solutions (sol gel);
- Will to learn new things.

What will you do?

- Operate the unique nanofiber production technology (production of ceramic and polymer nanofibers);
- Prepare polymer solutions, spin and calcinate nanofiberous materials;
- Optimize production processes, set up the technology for production in cooperation with R&D team;
- Cooperate with R&D team on development of new nanofiberous materials;
- Create production plans and processes;
- Plan production together with sales department.

What we offer?

- Work at new start up company with high potential
- Work in young team with perspective of professional grow
- Good salary
- International study trips

Place: **Nové Město na Moravě Czech Republic**

Start on: **February 2012**

**In case of your interest, please contact Mr. Jan Buk, Production Director**
